**Fig. 1S** Representative LC-MS/MS chromatogram from a plasma sample at 15 min after oral administration of 100 mg/kg ECa 233 on day 1.

**Note for Fig. 1S**

1) Retention times in the LC-MS/MS chromatogram represent each compound:

- Madecassoside at 1.79 min
- Asiaticoside at 1.82 min
