Fig. 1S Representative LC-MS/MS chromatogram from a plasma sample at 15 min after oral administration of 100 mg/kg ECa 233. The retention time of madecassoside is 1.79 min and for asiaticoside it is 1.82 min.
Fig. 2S MS/MS fragments of major (MD: madecassoside; AS: asiaticoside) and minor (CS: centellasaponin) components of ECa 233 from high-resolution LC-MS/MS.
