Supplementary Material to Su et al. “RAD001-mediated STAT3 upregulation and megakaryocytic differentiation” (Thromb Haemost 2013; 109.3)

Suppl. Figure 1: The biochemistry profiling for liver and renal functions of animal experiment. A) GOT/AST, B) GPT/ALT, and C) creatinine levels. Mice were divided into four groups, 10 mice per group. The results were expressed as the mean ± SD. * P < 0.05 was considered significantly different from the untreated control data.
