Supplemental information:

A low resolution FAB/MS (Fig.1S) of compound 6, illustrated the [M]$^+$ (m/z 772) and [M+H]$^+$ (m/z 773) peaks and also the [M+Na]$^+$ (m/z 795) ion.

Since [M]$^+$ ion is the largest, the HR-FAB/MS (Fig.2S) was attained from the corresponding [M]$^+$ ion.
