

EUROSON 2023 Congress

Dear Friends and Colleagues,

We are honoured to invite you to the EUROSON 2023 in Riga, Latvia, 25–27 May.

Ultrasound that unites is the leading theme we chose for the upcoming EUROSON congress.

This year's Special Focus Topics include Multiparametric ultrasound, Artificial intelligence and Point-of-Care Ultrasound Applications.

On behalf of the Organizing committee, let us kindly ask you to

Save the Date and Register for the EUROSON 2023

in Riga, Latvia, from 25–27 May next year
Early bird registration fees till 28th of February with Special fee for EFSUMB members

The main objective of the 34th EUROSON congress in 2023 for three days is to network and discuss the latest breakthroughs in clinical, scientific, and creative aspects of ultrasound, and to participate in discussions, joint sessions, workshops, and state-of-the-art performances displaying the future of ultrasound. It will be a comprehensive forum where various European experts and participants will exchange ideas and present the results of ongoing research and clinical challenges in the essential areas of ultrasonography. With EUROSON 2023, we also want to give medical students a platform for exchange with each other and with experienced ultrasound practitioners and let the public of Riga participate in the latest developments in ultrasound. State-of-the-art ultrasound technology will be available in a Sono-Cave so that experts can show how it is done and beginners can discover their love for ultrasound

Abstract submission

We invite you to enrich our scientific programme by sharing the abstract of your research.

Please note that the Abstract Submission Deadline is 1 December, 2022.
