J. Schoemaker, D. Naber, P. Vrijland, J. Panagides, R. Emsley
Long-Term Assessment of Asenapine vs. Olanzapine in Patients with Schizophrenia or Schizoaffective Disorder
Pharmacopsychiatry 2010; 43: 138–146

On p. 141, there are errors that incorrectly identify the figures which present weight gain data. The text “At week 52, using observed case data, mean \pm SD change was 1.6 ± 5.7 kg (3.5 ± 12.6 lbs) for asenapine and 5.6 ± 8.4 kg (12.3 ± 18.5 lbs) for olanzapine (**Fig. 3a**). At endpoint, using LOCF data from all treated patients, mean \pm SD changes were 0.9 ± 4.8 kg (2.0 ± 10.6 lbs) and 4.2 ± 7.6 kg (9.2 ± 16.8 lbs), respectively (**Fig. 3b**).” should be “At endpoint, using LOCF data from all treated patients, mean \pm SD changes were 0.9 ± 4.8 kg (2.0 ± 10.6 lbs) and 4.2 ± 7.6 kg (9.2 ± 16.8 lbs), respectively (**Fig. 3a**). At week 52, using observed case data, mean \pm SD change was 1.6 ± 5.7 kg (3.5 ± 12.6 lbs) for asenapine and 5.6 ± 8.4 kg (12.3 ± 18.5 lbs) for olanzapine (**Fig. 3b**).”

On p. 144, the text in the legend for figure 3 noting “Weight change over time in the safety population. A. OC analysis. B. Last observations carried forward (LOCF) analysis.” should be “Weight change over time in the safety population. A. Last observations carried forward (LOCF) analysis. B. OC analysis.”
