

## Erratum

### **Total Testosterone and Calculated Estimates for Free and Bioavailable Testosterone: Influence of Age and Body Mass Index and Establishment of Sex-Specific Reference Ranges**

*T. Deutschbein, K. Mann, S. Petersenn*

Hormone and Metabolic Research

Published online: 2015

DOI: 10.1055/s-0034-1395569

The last sentence of the first paragraph on page 3 was changed as follows:

FAI [11] was calculated in a modified way as a fraction of 1 as follows:  $FAI = \frac{TOT \text{ (nmol/l)}}{SHBG \text{ (nmol/l)}}$ .
