Total Testosterone and Calculated Estimates for Free and Bioavailable Testosterone: Influence of Age and Body Mass Index and Establishment of Sex-Specific Reference Ranges

T. Deutschbein, K. Mann, S. Petersenn

The last sentence of the first paragraph on page 3 was changed as follows:

FAI [11] was calculated in a modified way as a fraction of 1 as follows: FAI = TOT (nmol/l)/SHBG (nmol/l).
