ERRATUM

The German Society for Thoracic and Cardiovascular Surgery has informed the Editor-in-Chief that there is a mistake in ►Table V1 in the above article published in Thorac Cardiovasc Surg 2015; 63(4): 258–269 (DOI: 10.1055/s-0035-1551676). The correct ►Table V1 appears below.

Table V1 Isolated valve procedures (categories)

Procedures	N	Deaths	%
Single	18,408	625	3.4
Double	3,288	314	9.5
Triple	372	50	13.4
Transcatheter access (single valve)	9,184	386	4.2
Transcatheter access (double valve)	10	1	10.0
Not specified	97	8	8.2
Total	31,359	998	3.2

Notes: Combined procedures (with coronary artery bypass grafting, aortic surgery) are excluded.

Transcatheter valve procedures: 8,631 aortic valve implantations; 91 mitral valve implantations; 457 mitral valve repairs; 3 tricuspid valve implantations; 2 tricuspidal valve repairs; 10 combined procedures, aortic and mitral valve procedure; no pulmonary valve implantation.
