

Information on IMIA

International Medical Informatics Association

BOARD

President

Antoine Geissbuhler, Switzerland (2010 - 2013)

President elect

Lincoln de Assiss Moura Jr., Brazil (2011 - 2013)

Past President

Reinhold Haux, Germany (2010 - 2013)

Secretary

Lyn Hanmer, South Africa (2009 - 2015)

Treasurer

Lincoln de Assiss Moura, Brazil (2007 - 2012)

Sabine Koch, Sweden (2012 - 2015)

Vice Presidents

MedInfo

Riccardo Bellazzi (2010 - 2013)

Membership

Fernando Martin-Sanchez, Australia (2006 - 2012)

Michio Kimura, Japan (2012 - 2015)

Services

Casimir Kulikowski, United States (2006 - 2012)

Christoph Lehmann, United States (2012-2015)

Special Affairs

Arie Hasman, The Netherlands (2010 - 2013)

Working & Special Interest Groups

Hyeoun-Ae Park, Korea (2008 - 2014)

CEO

Peter Murray, United Kingdom
2010 - 2015

IMIA Web site: www.imia.org

IMIA REGIONS

APAMI: Asia Pacific Association for Medical Informatics

Michio Kimura, Japan, Vice President

EFMI: European Federation for Medical Informatics

Jacob Hofdijk, The Netherlands, Vice President

HELINA: African Region

Ghislain Kouematchoua, Germany/Cameroon, Vice President

IMIA-LAC: Regional Federation of Health Informatics for Latin America and the Caribbean

Carol Hullin, Chile, Vice-President

MEAHI - Middle East Association for Health Informatics

Ramin Moghaddam, Iran, Vice President

North American Region

Elizabeth Borycki, Canada, Vice-President

WELCOME TO IMIA!

General

The International Medical Informatics Association (IMIA) is the world body for health and biomedical informatics. As an 'association of associations', IMIA acts as a bridging organisation to bring together the constituent organisations and their members. IMIA provides leadership and expertise to the multidisciplinary, health focused community and to policy makers, to enable the transformation of healthcare in accord with the world-wide vision of improving the health of the world population. Inherent in IMIA's role is to bring together, from a global perspective, scientists, researchers, users, vendors, developers, consultants and suppliers in an environment of cooperation and sharing.

IMIA was established as an independent, not for profit organisation under Swiss law in 1989. IMIA was originally founded in 1967 as Technical Committee 4 of the International Federation for Information Processing (IFIP). Since 1979, IMIA has evolved from a Special Interest Group of IFIP to its current status as a fully independent international organisation. It continues to maintain its relationship with IFIP as an affiliate organisation and has an appointed Liaison Officer.

IMIA also has close and collaborative ties with the World Health Organization (WHO) as a NGO (Non Government Organization) with appointed Liaison Officers from both the WHO and IMIA.

The working language of IMIA is English.

Vision

The IMIA vision is that there will be a world-wide systems approach for healthcare. Clinicians, researchers, pa-

tients and people in general will be supported by informatics tools, processes and behaviours that make it easy to do the right thing, in the right way, at the right time to improve health care for all. This systems approach will incorporate and integrate research, clinical care and public health. To achieve this vision it will require everyone being supported by informatics-based information and communication systems and technologies.

IMIA will fulfil its vision by:

- Being the scientific informatics association through which the world's knowledge leaders come together to effectively and efficiently create, assemble, integrate, synthesize or assimilate intellectual knowledge that is required worldwide to advance biomedical informatics in its role of improving health and healthcare.
- Being the informatics association that effectively and efficiently connects people and the nations of the world to be able to accomplish the above purpose.

Membership

IMIA membership consists of Member Societies, Institutional and Affiliate Members, Honorary Fellows and Corresponding Members.

Member Societies generally represent individual countries, although in special circumstances, and as approved by the IMIA General Assembly, a country may have more than one Member Society in IMIA. An IMIA Member Society is a society, or a similar appropriate body, which is representative of the biomedical and health informatics activities within a country. In the absence of a Member Society, IMIA accommodates involvement by individuals through "Corresponding" membership, in particular for developing countries as a means of providing encouragement and support to

form a representative member society. IMIA now has almost 60 Member Societies; among new Member Societies accepted in 2011 are the eHealth Association of Pakistan (eHAP), the Health Informatics Society of Sri Lanka (HISSL) and the Peruvian Association of Biomedical Informatics (Asociación Peruana de Informática Biomédica). Many IMIA Member Societies hold regular events, or produce publications; information is on the IMIA website and IMIA assists in promoting such events through its IMIA News site and other channels.

IMIA Member Societies may organise into regional groups. IMIA regions now exist for all parts of the world, i.e. Asia/Pacific (APAMI), Europe (EFMI), Latin America and the Caribbean (IMIA-LAC), Africa (HELINA), the Middle East (MEAHI) and North America. Regions are represented at the IMIA General Assembly and Board by Vice Presidents appointed by their respective regional organisations. Regional activities were highlighted in 2011 through the HELINA conference held in Cameroon and the IMIA-LAC conference held in Mexico, as well as the continuation of activity in the EFMI (Europe) region through the EFMI Special Topic conference (Slovenia) and MIE2011 (Norway). In 2012, we will see the EFMI STC in Russia and MIE2012 in Italy.

Institutional Members consist of corporations and academic institutions. Corporate members currently include vendor, consulting, technology firms, publishers and national professional organisations. Academic members include universities, medical centres, research centres and other similar institutions. Academic members have recently organised to meet on annual basis in conjunction with the IMIA General Assembly to heighten connectivity and deal with areas of mutual interest.

Affiliate Members consist of international organisations that share an interest in the broad field of health and biomedical informatics. In addition to the WHO and IFIP, the International

Federation of Health Information Management Associations (IFHIMA) - formerly the International Federation of Health Records Organizations (IFHRO) - is an affiliate member of IMIA. IMIA's Liaison Officers to WHO (Dr. Antoine Geissbuhler, Switzerland) and IFIP (Dr. Hiroshi Takeda, Japan) are working collaboratively on projects of mutual interest.

Honorary Fellows are individuals who have demonstrated exceptional meritorious service in furthering the aims and interests of IMIA; fellowship is conferred for life.

Working and Special Interest Groups provide opportunities for collaboration among individuals who share common interests in a particular focal field. Many Working Groups hold working conferences on leading edge and timely health, medical and biomedical informatics issues. Current and future activities of the Working and Special Interest Groups are posted on the IMIA website, and highlighted through IMIA's increasing social media (Web 2.0) presence, such as the IMIA News blog site, Twitter, Facebook and LinkedIn, and a summary is included in the IMIA Yearbook. In 2012, a new "IMIA Working Group of the Year" Award will be instituted to recognise and encourage the activities of Working Groups.

Governance

IMIA is governed by a General Assembly, which meets annually. It consists of one representative from each IMIA Member Society and Institutional Member, Honorary Fellows, chairs of IMIA's Working Groups and representatives from Affiliate Members (the WHO, IFIP, IFHIMA), and each of IMIA's Regions. Only IMIA Member Societies have full voting rights.

The Board of IMIA, elected by the General Assembly, conducts the association's affairs. The day-to-day operations are supported by IMIA's CEO and other staff, who are also responsible

for IMIA's electronic services.

The officers of the Board and IMIA's Vice Presidents vigorously pursue IMIA's mission to:

- Monitor the range of special interest areas and focus support on new developments.
- Capitalize on the synergies and collective resources of IMIA's constituents.
- Minimize fragmentation between scientific and professional medical informaticians.
- Ensure successful adaptation to changes in the medical informatics marketplace and discipline.
- Raise the profile and awareness of IMIA within and outside of the IMIA organisation.
- Encourage cooperation between the scientific and commercial health informatics communities.
- Equitably balance support to emerging and existing IMIA members.
- Establish and maintain cooperation and harmony with organizations that emerge to address medical informatics issues.
- Continue to position IMIA as the gate-keeper for medical informatics issues in the international community.

Towards IMIA 2015 - IMIA Strategy and Transformation

IMIA's Strategic Plan, 'Towards IMIA 2015', was unanimously approved by the IMIA General Assembly at its meeting at MedInfo 2007 in Brisbane, Australia in August, 2007 (and in conjunction with IMIA's 40th birthday). The development of the IMIA Strategic Plan was initiated and lead by Dr. Nancy Lorenzi, IMIA Past President. The Strategic Planning Taskforce represented member societies, working groups, corporations, academic members and IMIA headquarters, and details the vision, guiding principles and strategic framework model [1] for what IMIA should do or become by the year

2015. A subsequent 'Transition Plan' was developed and also approved by the General Assembly; it acts as a flexible roadmap, or bridge, to the future, identifying specific areas of activity to guide and monitor evolution towards achieving the vision outlined in the IMIA Strategic Plan. The IMIA Strategic Plan, 'Towards IMIA 2015', and the Transition Plan are available on the IMIA website, and have been presented, and their development process discussed, in the IMIA Yearbook and other publications [1, 2, 3]. Work will be undertaken in 2012-13 to revise and update the IMIA Strategic Plan, so as to ensure that it remains appropriate to IMIA's needs and aspirations.

As part of the transformation of IMIA [4], the IMIA General Assembly meeting in Hiroshima, Japan in November 2009 approved proposals and a process for the expansion of IMIA's central office facilities and staffing, through a decentralised approach, considering the international scope of IMIA. The development of the new services will be undertaken in accordance with IMIA's financial constraints, and address different sections, such as member services, publication services, conference services, accreditation and international projects, in addition to the 'core tasks' on finances and preparing the IMIA Board and General Assembly meetings. With the generous support of the Health On the Net Foundation (HON), an IMIA Institutional Member, the current office address in Geneva has been established, and the post of CEO (formerly Executive Director) has been established to head this work. The main IMIA website has been transitioned to a robust content management system that will allow incremental expansion of services to members and the wider community, and other electronic services are being developed. The IMIA Statutes have been updated and changes were approved at the 2010 IMIA General Assembly meeting in Cape Town, South Africa.

An important aspect of IMIA's development in the next few years will be to develop and strengthen our partnerships and synergies, both within IMIA's community, and by reaching out to other organizations, in particular in the fields of standards and global health. IMIA will also leverage the capacity and diversity of our members and of our regions, which represent the true richness of IMIA. In early steps to building such partnerships, IMIA signed a Letter of Understanding (LoU) with GHIP (Global Health Informatics Partnership, a wholly-owned subsidiary of AMIA) to collaborate globally to help empower health workers to act locally to improve health and health care delivery. GHIP is an international learning community that, through engagement with institutional stakeholders and individuals, is dedicated to knowledge-transfer activities and supporting a collaborative ecosystem for developing solutions to problems in real-world settings, guided by established informatics principles. During 2011, IMIA has been involved with a number of international bodies to collaborate on the development of a Special Theme Issue of the World Health Organization Bulletin devoted to eHealth. Further projects will be developed to both strengthen IMIA's links with like-minded organisations and to generate income to support other activities. IMIA will also build on the strength and domain expertise of its Working Groups and Special Interest Groups: many of them will be commissioned to produce reviews and white papers in their fields of expertise, helping to establish IMIA as a leading voice to inform the various stakeholders and decision-makers with quality information, knowledge and advice.

MedInfo and NI Congress

IMIA organises the internationally acclaimed triennial "World Congress on Medical and Health Informatics", MedInfo. MedInfo 2010 was held in

Cape Town, South Africa on September 12 - 15, 2010, hosted by the South African Health Informatics Association (SAHIA). This marked the first time that a MedInfo had been held on the African Continent. Previous MedInfo events have been held in Stockholm, Sweden (1974), Toronto, Canada, (1977), Tokyo, Japan (1980), Amsterdam, The Netherlands (1983), Washington, USA (1986), Beijing/Singapore (1989), Geneva, Switzerland (1992), Vancouver, Canada (1995), Seoul, Korea (1998), London, UK (2001), San Francisco, USA (2004), and Brisbane, Australia (2007).

MedInfo 2013 will be held in Copenhagen, Denmark, and MedInfo 2015 will be held in Sao Paulo, Brazil, the first time it will have been held in Latin America. MedInfo 2015 will see the start of a new cycle of MedInfo being held every two years. The selection of the host for MedInfo 2017 will be made at the 2012 IMIA General Assembly, to be held in Beijing, China.

The NI (nursing informatics) Congress has been held every three years since 1982, under the auspices of the IMIA Special Interest Group in Nursing Informatics (IMIA NI SIG). The first NI Congress was held in London, UK, followed by Calgary, Canada (1985), Dublin, Ireland (1988), Melbourne, Australia (1991), San Antonio, Texas, USA (1994), Stockholm, Sweden (1997), Auckland, New Zealand (2000), Rio de Janeiro, Brazil (2003), Seoul, Korea (2006), and Helsinki, Finland (2009). The 2012 NI Congress will be in Montreal, Canada on 23-27 June (see www.ni2012.org).

IMIA Recommendations on Health and Biomedical Informatics Education

Health and biomedical informatics education has existed now for more than 35 years, and the demand is still expanding worldwide. It has long been a key part of IMIA's activity, with IMIA's first Working Group being concerned with education. As the international organization devoted to health

and biomedical informatics, IMIA developed recommendations on education in health and medical informatics that were first published in 2000 and have been extensively used in the development of programmes of health and biomedical informatics education. Under the leadership of John Mantas, the IMIA recommendations on education were updated and published in 2010 [5]. They are available through the IMIA website, and we welcome their re-publication and translation.

IMIA Code of Ethics

IMIA adopted the “IMIA Code of Ethics for Health Information Professionals” in 2002. The code has been translated into several languages, is being translated into others, and is freely available to the public at IMIA’s website. Work is currently being undertaken to explore the need for any update to the code, and undertake any changes.

Official Journals

Three scientific publications have been accorded the status of “an Official Journal of the International Medical Informatics Association” since 2003:

Methods of Information in Medicine and *Applied Clinical Informatics* (Schattauer Publishers, Stuttgart) and Elsevier Science’s *International Journal of Medical Informatics*.

In 2011, *Methods* celebrated its 50th year of continuous publication, and made most of its archive material freely available on the website (www.methods-online.com). A special invitational symposium held in Heidelberg, Germany celebrated this achievement and resulted in a series of special papers published in *Methods* at the end of the year.

Communications and Interaction

IMIA continues to develop its communication with members and others through its website (<http://www.imia.org>). The site is being continually developed, and contains profiles of its members, working groups and activities. IMIA is constantly striving to improve the services it provides to its members and the informatics community in general by promoting free interaction among and between its member network and the bio-medical and health informatics community at large. IMIA’s frequently updated news site (<http://imianews.wordpress.com>) provides information on IMIA activities and events and those provided by other organisations that might be of interest to IMIA members and the wider global health and biomedical informatics community. IMIA also publishes a monthly email newsletter that is distributed to its members and

contacts. Through input from the IMIA Social Media Working Group, further modes of interaction with and between IMIA members and the wider global health and biomedical informatics communities are being developed. IMIA has presences on social media sites, including Twitter (@IMIAtweets, @imia_medinfo), Facebook and LinkedIn, and has been exploring new methods of access to information, for example through providing a version of the IMIA News site that is customised to iPad access.
