Dear Dr. Eberval Figueiredo

In the recent volume 39(2) of the Brazilian Journal of Neurosurgery, we were deeply and negatively surprised with the finding in the article "Microsurgical and Endoscopic Anatomy of the Cavernous Sinus", coauthored by yourself. The first author alluded to be a member of our University (Universidade Federal do Rio Grande do Sul). Unless this was done by an improper digitation error, we, here, never found any position of this doctor in our Medical School. This being so, according to the possible legal and ethical responsibilities, we ask prompt manifestation of the authors or the journal for proper corrections and explanations.

Porto Alegre February 23, 2021

Apio Antunes

Chairman of Neurosurgical Unit, University Hospital

Associate Professor of Neurosurgery

Porto Alegre Medical School
