2023 Eberhard F. Mammen Award Announcements: Part I—Most Popular Articles

Emmanuel J. Favaloro, PhD, FFSc (RCPA)¹ 

¹Department of Haematology, Institute of Clinical Pathology and Medical Research (ICPMR), Westmead Hospital, Westmead, New South Wales, Australia

Semin Thromb Hemost 2023;49:417–426.

Welcome to the latest of our Eberhard F. Mammen award announcements. As noted in previous editorials (► **Table 1**), Thieme, the publisher of *Seminars in Thrombosis and Hemostasis* (STH), has created the “Eberhard F. Mammen Excellence in Thrombosis and Hemostasis Awards” in honor of Eberhard Mammen (► **Fig. 1**), and in recognition of his contribution to this field and to the journal that he both founded and steered for over three decades. These awards began in 2009, under two categories, “Most Popular Article Awards” and “Young Investigator Awards.” Accordingly, 2023 represents 15 years of award presentations (► **Table 1**). Current details and conditions of the award can be summarized as:

- **Most popular article awards:** Awarded to the authors of the most popular articles published in *STH* in the preceding 2 years as captured in the preceding year. The awards are determined by the editor in chief on the basis of user statistics from Thieme e-Journals. Prefaces, Errata, Letters to the Editor, Editorials, Commentaries, and previous award-winning articles are excluded from further consideration of these awards, which currently comprise two categories—one for “Free Access” articles and another for a “General Category.” There are two major cash prizes of US\$ 1,000 for each category. In addition, winners of the “General Category” awards are granted “Free Access” status for these articles thereafter.
- **Young investigator awards:** Best presentation or meeting abstract by a young investigator—as presented or delivered to an international or large regional meeting on a topic related to the fields of thrombosis and hemostasis, and whose subject matter is determined to be in the spirit of Dr. Mammen (up to six cash prizes of US\$ 1,000 in any year). There are some additional considerations and conditions for the award, and

awardees are expected to prepare a review or other article related to the topic of their presentation (or as otherwise agreed) for publication in *STH*. Previous award winners are excluded from a second award to enable more individuals to be recognized. After nominations are received, the awardees are selected by a vote of the senior editors of *STH*. Any potential conflicts of interest are managed by first identifying these, and then excluding those with potential conflicts from voting. Finally, given the current coronavirus disease 2019 (COVID-19) pandemic, many international congresses have become virtual meetings, and accordingly, virtual meeting presentations can also be considered for the award.

Further details of the awards and the award winners are posted online (<https://www.thieme-connect.com/products/ejournals/journal/10.1055/s-00000077>), and previous award winner announcements are also available in print (see ► **Table 1**).

18. Favaloro EJ. 2018 Eberhard F. Mammen Award Announcements: Part I - Most Popular Articles. *Semin Thromb Hemost* 2018;44(3):185–192
19. Favaloro EJ. 2018 Eberhard F. Mammen Award Announcements: Part II - Young Investigator Awards. *Semin Thromb Hemost* 2019;45(2):123–129
20. Favaloro EJ. 2019 Eberhard F. Mammen Award Announcements: Part I - Most Popular Articles. *Semin Thromb Hemost* 2019;45(3):215–224
21. Favaloro EJ. 2019 Eberhard F. Mammen Award Announcements: Part II—Young Investigator Awards. *Semin Thromb Hemost* 2020;46(2):105–113
22. Favaloro EJ. 2020 Eberhard F. Mammen Award Announcements: Part I - Most Popular Articles. *Semin Thromb Hemost* 2020;46(4):383–392
23. Favaloro EJ. 2020 Eberhard F. Mammen Award Announcements: Part II - Young Investigator Awards. *Semin Thromb Hemost* 2021;47(3):229–237
24. Favaloro EJ. 2021 Eberhard F. Mammen Award Announcements: Part I - Most Popular Articles. *Semin Thromb Hemost* 2021;47(5):467–476
25. Favaloro EJ. 2021 Eberhard F. Mammen Award Announcements: Part II - Young Investigator Awards. *Semin Thromb Hemost* 2022;48(3):265–273
26. Favaloro EJ. 2022 Eberhard F. Mammen Award Announcements: Part I - Most Popular Articles. *Semin Thromb Hemost* 2022;48(5):502–513

It is therefore with great pleasure that we would like to announce the latest winners of the 2023 Eberhard F. Mammen awards for the most popular articles from *STH*, as downloaded in 2022 and as published in the period of 2021–2022 inclusive.

2023 “Most Popular” Article Awards

As mentioned, the Most Popular awards are given to the authors of the most popular articles published in *STH* as determined on the basis of user statistics from the publisher of this journal and covering the preceding 2-year publication period, as captured in the preceding year. Thus, the 2023 “Most Popular” awards are granted to the most popular

articles, as downloaded in 2022, and as published in the years 2021–2022 inclusive. Previous Eberhard F. Mammen award winning articles are listed in ► **Table 2**. These articles are currently freely available online (<https://www.thieme-connect.com/products/ejournals/journal/10.1055/s-00000077>), and no longer qualify for future awards, although some will continue to appear in the most popular download statistics provided by the publisher.

There is also an increasingly recognized trend to publish articles under an open-access model, and these, as well as other freely available articles, will therefore have an “inequitable advantage” over other “non-open access/non-freely available” articles in terms of potential for downloads or perceived popularity due to their free accessibility.

Table 2 Previous most popular award-winning papers

Year	Awarded for
2009	Jurk K, Kehrel BE. Platelets: physiology and biochemistry. <i>Semin Thromb Hemost</i> 2005;31(4):381–392
2009	Girolami B, Girolami A. Heparin-induced thrombocytopenia: a review. <i>Semin Thromb Hemost</i> 2006;32(8):803–809
2010	Harenberg J, Wehling M. Current and future prospects for anticoagulant therapy: inhibitors of factor Xa and factor IIa. <i>Semin Thromb Hemost</i> 2008;34(1):39–57
2010	Prechel M, Walenga JM. The laboratory diagnosis and clinical management of patients with heparin-induced thrombocytopenia: an update. <i>Semin Thromb Hemost</i> 2008;34(1):86–96
2010	Fareed J, Hoppensteadt DA, Fareed D, Demir M, Wahi R, Clarke M, Adiguzel C, Bick R. Survival of heparins, oral anticoagulants, and aspirin after the year 2010. <i>Semin Thromb Hemost</i> 2008;34(1):58–73
2011	Sobieraj-Teague M, O'Donnell M, Eikelboom J. New anticoagulants for atrial fibrillation. <i>Semin Thromb Hemost</i> 2009;35(5):515–524
2011	Mariani G, Bernardi F. Factor VII deficiency. <i>Semin Thromb Hemost</i> 2009;35(4):400–406
2012	Lippi G, Franchini M, Favaloro EJ, Targher G. Moderate red wine consumption and cardiovascular disease risk: beyond the “French paradox.” <i>Semin Thromb Hemost</i> 2010;36(1):59–70
2012	Rak J. Microparticles in cancer. <i>Semin Thromb Hemost</i> 2010;36(8):888–906
2013	Fava C, Montagnana M, Favaloro EJ, Guidi GC, Lippi G. Obstructive sleep apnea syndrome and cardiovascular diseases. <i>Semin Thromb Hemost</i> 2011;37(3):280–297
2013	Tufano A, Guida A, Dario Di Minno MN, Prisco D, Cerbone AM, Minno GD. Prevention of venous thromboembolism in medical patients with thrombocytopenia or with platelet dysfunction: a review of the literature. <i>Semin Thromb Hemost</i> 2011;37(3):267–274
2014	Salmela B, Joutsu-Korhonen L, Armstrong E, Lassila R. Active online assessment of patients using new oral anticoagulants: bleeding risk, compliance, and coagulation analysis. <i>Semin Thromb Hemost</i> 2012;38(1):23–30
2014	Chapman K, Seldon M, Richards R. Thrombotic microangiopathies, thrombotic thrombocytopenic purpura, and ADAMTS-13. <i>Semin Thromb Hemost</i> 2012;38(1):47–54
2014	Kenet G, Aronis S, Berkun Y, Bonduel M, Chan A, Goldenberg NA, Holzhauer S, Iorio A, Journeycake J, Junker R, Male C, Manco-Johnson M, Massicotte P, Mesters R, Monagle P, van Ommen H, Rafini L, Simioni P, Young G, Nowak-Göttl U. Impact of persistent antiphospholipid antibodies on risk of incident symptomatic thromboembolism in children: a systematic review and meta-analysis. <i>Semin Thromb Hemost</i> 2011;37(7):802–809
2015	Tapson VF. Thrombolytic therapy for acute pulmonary embolism. <i>Semin Thromb Hemost</i> 2013;39(4):452–458
2015	George JN, Charania RS. Evaluation of patients with microangiopathic hemolytic anemia and thrombocytopenia. <i>Semin Thromb Hemost</i> 2013;39(2):153–160
2015 ^a	Hylek EM. Anticoagulation therapy for atrial fibrillation. <i>Semin Thromb Hemost</i> 2013;39(2):147–152
2015 ^a	Rojas-Hernandez CM, Garcia DA. The novel oral anticoagulants. <i>Semin Thromb Hemost</i> 2013;39(2):117–126
2016	de Moerloose P, Casini A, Neerman-Arbez M. Congenital fibrinogen disorders: an update. <i>Semin Thromb Hemost</i> 2013;39(6):585–595
2016	Sethi S, Fervenza FC. Pathology of renal diseases associated with dysfunction of the alternative pathway of complement: C3 glomerulopathy and atypical hemolytic uremic syndrome (aHUS). <i>Semin Thromb Hemost</i> 2014;40(4):416–421
2016 ^a	Bates SM. D-dimer assays in diagnosis and management of thrombotic and bleeding disorders. <i>Semin Thromb Hemost</i> 2012;38(7):673–682
2016 ^a	Lippi G, Favaloro EJ, Meschi T, Mattiuzzi C, Borghi L, Cervellin G. E-cigarettes and cardiovascular risk: beyond science and mysticism. <i>Semin Thromb Hemost</i> 2014;40(1):60–65
2017	Boonyawat K, Crowther MA. Venous thromboembolism prophylaxis in critically ill patients. <i>Semin Thromb Hemost</i> 2015;41(1):68–74
2017	Levi M, Poll TV. Coagulation in patients with severe sepsis. <i>Semin Thromb Hemost</i> 2015;41(1):9–15
2017 ^a	Moore GW. Recent guidelines and recommendations for laboratory detection of lupus anticoagulants. <i>Semin Thromb Hemost</i> 2014;40(2):163–171
2017 ^a	Warkentin TE. Heparin-Induced Thrombocytopenia in Critically Ill Patients. <i>Semin Thromb Hemost</i> . 2015;41(1):49–60

2022 ^a	Allaoui A, Khawaja AA, Badad O, Naciri M, Lordkipanidzé M, Guessous F, Zaid Y. Platelet function in viral immunity and SARS-CoV-2 infection. <i>Semin Thromb Hemost</i> 2021;47(4):419–426

^aNew “Free Access” category created in 2015.

^bThis paper qualified as the “Most Popular” award based on download data provided by the publisher; however, as this paper was written by the journal editor in chief, there was an obvious conflict of interest, and the award was officially declined. This paper is listed here merely as a statement of record.

Accordingly, the publisher of *STH* has established separate categories of the Most Popular Award for “Free Access” articles and an alternate “General Category” (non-free access). Consequently, the most popular articles from each category are identified separately. ▶ **Tables 3** and **4**, respectively, list the top 15 downloaded articles from *STH* in 2022 (from 2021 and 2022 inclusive), as eligible for either the “free access” (▶ **Table 3**)^{1–15} or the “General Category” (▶ **Table 4**)^{16–30} awards. As expected, the majority of the “Free Access” articles were related to COVID-19. The top downloaded

article, by Allaoui et al, on platelet function in viral immunity and SARS-CoV-2 infection won a 2022 Most Popular award, and is thus ineligible for the 2023 award. The next top downloaded article by Lippi and Favaloro, on cerebral venous thrombosis developing after COVID-19 vaccination, is eligible for the 2023 Most Popular award; however, given I was an author of the article, and I am also the Editor in Chief of the journal, with this representing an obvious conflict, I will decline the associated cash prize, as will also Professor Lippi. The Publisher has agreed to present this cash prize instead to

^a2021–2022 inclusive, as downloaded in 2022. Ranking is according to download data provided by journal publisher, and excludes nonqualifying material (e.g., Prefaces, Errata, Letters to the Editor, Editorials, Commentaries, and previous award-winning articles).

a "third" article for this category. Therefore, the 2023 Eberhard F. Mammen award winners for most popular article (2021/2022 inclusive, as downloaded in 2022) are as follows:

Free Access Category^{2–4}

- Lippi G, Favaloro EJ. Cerebral venous thrombosis developing after COVID-19 vaccination: VITT, VATT, TTS, and more. *Semin Thromb Hemost* 2022 Feb;48(1):8–14. (*Note:* Authors will decline the cash prize, which publisher will assign to a third article for this category).
- Engelen MM, Vandenbrielle C, Balthazar T, Claeys E, Gunst J, Guler I, Jacquemin M, Janssens S, Lorent N, Liesenborghs L, Peerlinck K, Pieters G, Rex S, Sinonquel P, Van der Linden L, Van Laer C, Vos R, Wauters J, Wilmer A, Verhamme P, Vanassche T. Venous thromboembolism in patients discharged after COVID-19 hospitalization. *Semin Thromb Hemost* 2021 Jun;47(4):362–371.
- Parisi R, Costanzo S, Di Castelnuovo A, de Gaetano G, Donati MB, Iacoviello L. Different anticoagulant regimens, mortality, and bleeding in hospitalized patients with

COVID-19: a systematic review and an updated meta-analysis. *Semin Thromb Hemost* 2021 Jun;47(4):372–391.

Thus, the cash prize will be awarded to the authors of the second and third authorship teams of Engelen et al³ and Parisi et al.⁴ Of interest, the manuscript from Engelen et al represents the submission from a prior (2020) Young Investigator Award winner,³¹ and is also an original study, thereby again validating the Young Investigator Award process as well as the journal's decision to continue to publish high-quality original studies.³²

General Category^{16,17}

- Branstetter J, Kiskaddon AL, King MA, Coalter C, Grubbs KM, Fly H, Male C, Brandão L, Goldenberg NA. Efficacy and safety of non-vitamin K antagonist oral anticoagulants in pediatric venous thromboembolism treatment and thromboprophylaxis: a systematic review of the literature. *Semin Thromb Hemost* 2021 Sep;47(6):643–653.

2. Ichinose A, Osaki T, Soury M. A review of coagulation abnormalities of autoimmune acquired factor V deficiency with a focus on Japan. *Semin Thromb Hemost* 2022 Mar;48(2):206–218.

Of further interest, there are two other previous Young Investigator Award winners listed in **Table 4**. Ellen Driever was another 2020 Young Investigator Award winner,³¹ and the listed article²⁹ represents the submission provided as a condition of the award, so once again validating the Young Investigator Awards. Hanny Al-Samkari was also a 2020 Young Investigator Award winner,³¹ and his article also represents the submission provided as a condition of the award.²³

As always, I always get considerable satisfaction in announcing these awards. This year once again saw the topic of COVID-19 take prominence, not only worldwide but also in this journal. I predicted that COVID-19-related reviews would do well in the popular awards in an earlier (2021) editorial.³³ Thieme, the publisher of *STH*, was, until 2023, providing most COVID-19-related articles freely available from their Web site. To date, we have published four issues of *STH* related to COVID-19,^{34–37} and all have proven very popular with the readership. *STH* included a series of “editorial” commentaries early in the COVID-19 pandemic; these have also proven to be very popular with the readership, and many were listed in the top 2022 downloads list; however, these do not qualify for the Most Popular awards.

All authors of the award-winning articles were thrilled to hear that their articles had won an Eberhard F. Mammen Most Popular award, and provided their own personal responses to the news.

From Professor Giuseppe Lippi (**Fig. 2**), speaking also on my behalf, “It is a real pleasure and privilege to be granted one of the Eberhard F. Mammen Seminars in Thrombosis and Hemostasis 2023 Awards for our article entitled “Cerebral Venous Thrombosis Developing after COVID-19 Vaccination: VITT, VATT, TTS, and More.” We are pleasantly surprised to know that this article has gained interest and momentum over the past year, largely as a result of the large diffusion of

Fig. 2 Professor Giuseppe Lippi.

COVID-19 vaccination which, as we know, is the most essential tool for managing the pandemic, but also carries some inherent risks as with the administration of any other vaccine or even common drugs (such as aspirin). This actually supports our proposal to develop a tailored (perhaps laboratory-based) model of vaccination aimed at enhancing the benefits to those who would benefit more, and minimizing the possible complications in those who could safely delay boosters. We also wish to thank the publisher for promoting the field by application of the Eberhard F. Mammen awards. We have declined the cash prize, and instead requested that the prize money funds an additional Most Popular award on this occasion, which the publisher has agreed to.”

From Matthias M. Engelen (**Fig. 3**), speaking on behalf of all authors (some of who also appear in **Fig. 3**), “We are truly honored to be granted one of two Eberhard F. Mammen awards in Seminars in Thrombosis and Haemostasis for Most Popular Article in the open access category. During the pandemic, we quickly needed answers regarding the thrombotic risk and the thromboprophylactic therapy in COVID-19 patients. We are, therefore, thrilled that our article on venous thromboembolism in patients discharged after COVID-19 hospitalization was widely read in this prestigious journal. We want to thank all collaborators for making it possible to systematically screen discharged COVID-19 patients in these

challenging times. We especially thank the editor-in-chief, Emmanuel Falavero, for reaching out to us after we presented our late-breaking data at the virtual International Society on Thrombosis and Haemostasis meeting, as indeed, it proved to be of great interest to the readers of this outstanding journal. We are very grateful to have had the opportunity to work together on publishing our findings in STH.”

From Simona Costanzo and Roberta Parisi, speaking on behalf of all authors (► **Fig. 4**): “We are deeply honored to have been granted one of the “Eberhard F. Mammen Seminars in Thrombosis and Hemostasis 2023 Most Popular Article Awards” for the “Free Access Category.” We were pleasantly surprised and excited to hear that our article entitled “*Different Anticoagulant Regimens, Mortality, and Bleeding in Hospitalized Patients with COVID-19: A Systematic Review and an Updated Meta-Analysis*” was widely appreciated by the scientific community. The idea for our article originated following the results of the multicenter Italian CORIST study where we had observed a remarkable reduction of in-hospital COVID-19 patients’ mortality associated with use of low-molecular-weight heparin [1].³⁸ This prompted us to define, using a large meta-analysis, the type and dosage of heparin and other anticoagulant drugs used in the management of hospitalized COVID-19 patients.

Our findings, promptly published in STH, were taken into consideration by the Italian Medicines Agency (AIFA) to guide anticoagulant management of these patients [2].³⁹ We are glad that our article continues to capture the attention of a large proportion of the STH readership even today. We would like to thank the editors of STH for the opportunity to publish our research in this prestigious journal. This award inspires us to pursue our research to provide novel insights on the role of blood coagulation in the severity and clinical outcomes of COVID-19 patients.”

From Joshua W. Branstetter and Amy L. Kiskaddon (► **Fig. 5**), on behalf of all authors, “We are truly privileged to receive one of the 2023 Eberhard F. Mammen Seminars in Thrombosis and Hemostasis Most Popular Article Awards. We are excited to learn that our systematic review of non-vitamin K antagonist oral anticoagulants in pediatric patients outlining both published clinical data and studies on the horizon was well received. Our manuscript outlines the emerging data regarding venous thromboembolism treatment and thromboprophylaxis with non-vitamin K antagonist oral anticoagulants in pediatric patients. The clinical use of these agents in pediatrics is rapidly increasing and we hope our manuscript will continue to serve as a succinct resource outlining this information. We would like to thank our wonderful co-authors for their contributions and input to improve the relevance of this paper. We greatly appreciate the opportunity to share this knowledge with the readership of STH, and are truly honored to have had the contribution rewarded by this honor.”

From Professor Akitada Ichinose (► **Fig. 6**), speaking also on behalf of his coauthors (one of who also appears in ► **Fig. 6**): “We were very surprised and greatly honored to learn that our paper received one of the STH 2023 Eberhard F. Mammen Most Popular Article Awards for the

Fig. 5 From left: Joshua W. Branstetter and Amy L. Kiskaddon.

Fig. 6 From left: Akitada Ichinose and Tsukasa Osaki.

'General Category.' Since 2009, we have been conducting nationwide surveys on unexplained severe hemorrhagic disorders in Japan. As a result, we have established a registry of autoimmune acquired coagulation factor deficiencies due to autoantibodies against factor XIII, von Willebrand factor, factor VIII, factor V, factor X, etc. as part of the Designated Intractable Disease-288 of the Japanese Ministry of Health, Labor and Welfare and thus, we have achieved significant outcomes in providing medical and economic support to many patients. The study on autoimmune acquired factor V deficiency, which received the award on this occasion, is part of this project, and we expect that the findings reported in the manuscript will contribute to the management of more patients in the future. Finally, I would like to thank the editors of *STH* for giving us the opportunity to publish our work in this journal, the readers who appreciated this particular paper, and the researchers who supported our collaborative study."

I would, as always, like to thank not only all of the authors listed in ►**Tables 2 to 4**, but also all the other contributing authors who did not manage to make these listings, as well as all the many other guest editors of issues recently published in *STH*. I likewise look forward to seeing future listings—always a great pleasure and sometimes a surprise.
