Figures **4a**, **4b** and **4c** were printed in black and white but should have been printed in colour as shown below:

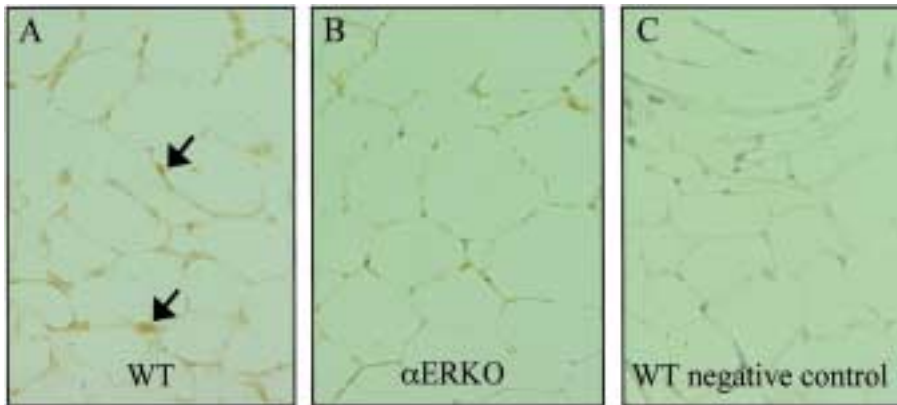

Fig. 4 Immunostaining for ER β in adult female mouse parametrial adipose tissue from WT (**A**) or α ERKO (**B**) mice. Specific staining for ER β was seen in nuclei in adipose tissue from both the WT and α ERKO mice (arrows), while the control sections incubated with preimmune serum from the same sheep (**C**) did not show nuclear staining.
