One-Pot Multicomponent Synthesis of β -Acetamido Ketones Based on BiCl_3 Generated in situ from the Procatalyst BiOCl and Acetyl Chloride

Rina Ghosh,* Swarupananda Maiti, Arijit Chakraborty *Synlett* **2005**, 115.

Entries 12 and 13 in Table 2 under column headings 'Aromatic aldehyde' and ' β -Acetamido ketone' were incorrectly represented.

The correct entries (12 and 13) have a nitro group at R^2 and are thus:

$\text{R}^2 = \text{NO}_2$, $\text{R}^1 = \text{R}^3 = \text{H}$ (**3**) in place of $\text{R}^1 = \text{R}^2 = \text{R}^3 = \text{H}$ (**1**)

$\text{R}^2 = \text{NO}_2$, $\text{R}^1 = \text{R}^3 = \text{R}^5 = \text{H}$, $\text{R}^4 = \text{R}^6 = \text{Ph}$ (**22**) in place of $\text{R}^1 = \text{R}^2 = \text{R}^3 = \text{R}^5 = \text{H}$, $\text{R}^4 = \text{R}^6 = \text{Ph}$ (**22**)

The accompanying text on page 116, paragraph 1, line 5 is to be changed accordingly:

'Reaction of *m*-nitrobenzaldehyde (**3**) and acetophenone (**10**) with benzonitrile in the presence of BiOCl and acetyl chloride also proceeds in dichloromethane (entry 12) or in neat condition (entry 13) affording the corresponding β -benz-amido ketone (**22**) in good yields.'

The authors apologize for these mistakes.
