## Erratum

Unfortunately two mistakes occurred in the publication of the article Davis MD et al. Early retinopathy progression in four randomized trials comparing insulin glargine and NPH insulin. *Exp Clin Endocrinol Diabetes* 2007; 115: 240–243.

The title is incorrect: 'Nph' should be read in capitals as 'NPH'.

In the results section on page 241 it incorrectly reads 'type 1 diabetes' in "There were no notable differences between treatment groups except for a slightly greater proportion of patients with no retinopathy in the insulin glargine group in the US type 1 diabetes trial." Correctly it should read 'type 2 diabetes'.
