

Erratum

4,5-Dihydroisoxazoles by Copper(II)-Catalysed Condensation of Primary Nitroalkanes with Dipolarophiles

Luca Cecchi, Francesco De Sarlo,* Fabrizio Machetti* *Synlett* **2007**, 2451.

The advanced online publication (e-First) of this article included two incorrect chemical names (p. 2451, 2nd column, 2nd paragraph). The correct sentence is shown below.

'Isolated products are not only oxidation products (open-chain or substituted isoxazoline *N*-oxides) but also substituted 2-isoxazolines, as a result of addition–dehydration: Cu(II) or Co(II) acetates have a similar dehydrating effect.'⁷

The errors have been corrected for both the print and the current online versions.
