A Stable, Convertible Isonitrile as a Formic Acid Carbanion [−COOH] Equivalent and Its Application in Multicomponent Reactions

Oliver Kreye, Bernhard Westermann, Ludger A. Wessjohann* *Synlett* **2007**, 3188–3192.

After this paper had been published the authors realized that another recent literature related to the published paper should have been cited: Vamos, M.; Ozboya, K.; Kobayashi, Y. ‘Synthesis of Bicyclic Pyroglutamic Acid Featuring the Ugi Reaction and the Unique Stereoisomerization at the Ring Junction by Grob Fragmentation followed by Transannular Ketene [2+2] Cycloaddition Reaction’ *Synlett* **2007**, 1595–1599.

The authors apologize for not citing this work.
