

JAAA CEU Program

Volume 29, Number 10 (November/December 2018)

Questions refer to Billings et al, “A Large-Scale Examination of Veterans with Normal Pure-Tone Hearing Thresholds within the Department of Veterans Affairs,” 928–935.

Learner Outcomes:

Readers of this article should be able to:

- Identify the prevalence of Veterans with normal pure-tone thresholds seen within the VA system.
- Describe the prevalence of abnormal clinical test results among these Veterans with normal pure-tone thresholds.

CEU Questions:

1. Which of the following is true regarding best practice guidelines for treatment of patients with hearing difficulties that have normal pure-tone hearing thresholds?
 - a. guidelines have been published
 - b. all audiologists agree on what treatment(s) should be recommended for those with normal hearing reporting hearing difficulties
 - c. guidelines have not been published and many audiologists are unsure how to treat this population.
2. Patients with normal hearing thresholds who report hearing difficulty have been linked to following conditions:
 - a. selective dysacusis, auditory processing disorder
 - b. addiction disorders, obscure auditory dysfunction
 - c. auditory inferiority complex, obesity
3. Veteran’s with normal hearing pure-tone thresholds are unique in that they often have
 - a. an affinity for singing
 - b. difficulties expressing their desires in the clinic
 - c. comorbidities related to military service
4. Why can’t conclusions about age and hearing loss be drawn from the results?
 - a. thresholds were limited to 25 dB HL
 - b. patients over 90 were aggregated into a single category because of HIPAA regulations
 - c. standard error for populations older than 60 were too large
5. In this study, what percentage of veterans were determined to have normal hearing with pure-tone thresholds ≤ 25 dB HL at all octave frequencies?
 - a. 5%
 - b. 10%
 - c. 3%
6. In Veterans with normal hearing pure-tone thresholds, what is the prevalence of having an abnormality on at least one additional test in either ear?
 - a. 23%
 - b. 30%
 - c. 41%
7. Which of the following is true regarding notches in this population of Veterans?
 - a. left ear notches were more prevalent and deeper
 - b. right ear notches were more prevalent and deeper
 - c. no differences were seen in the prevalence or depth of notches between the right and left ear
8. Compared to civilian populations, this study found the prevalence of Veterans with normal hearing to be:
 - a. twice as high
 - b. the same
 - c. lower
9. Which of the following is a reason that the prevalence number from this article may underestimate the number of Veterans with normal thresholds?
 - a. interoctave frequencies were not considered in the analysis
 - b. test results were not consistently entered into the repository when hearing aids were not ordered
 - c. the majority of patients presented with subjective complaints of hearing loss
10. What evidence from this article supports testing -inter-octave frequencies in Veterans?
 - a. abnormal word recognition in about 5% of normal-hearing Veterans
 - b. audiometric notches are present only at 3k and 6k Hz in about 5% of normal-hearing Veterans
 - c. abnormal acoustic reflex testing results in 30% of normal-hearing Veterans

JAAA CEU PROGRAM

WHO? All members of the Academy receive the CE Registry as a member benefit and are eligible to participate in the JAAA CEU Program.

WHAT? The JAAA CEU Program offers a minimum of 1.6 CEUs (16 continuing education hours) per volume year. Individuals can submit one or all JAAA CEU assessments for scoring and CEU credit. Each JAAA assessment is worth .2 CEUs.

WHERE? eAudiology.org—Your CEU Source

Participants can complete the assessments using the eAudiology.org online submission system, which provides automatic feedback (score, correct answers) and automatic recording to the member’s CE Registry record.

WHEN? Volume 29 (2018) assessments will be accepted through December 31, 2018. Volume 29 submissions will be accepted by e-mail or online at eAudiology.org. Submissions are credited in the calendar year they are submitted. You may enroll in the CEU program for 2018 (Volume 29) with a payment of \$95 for the year. This will enable you to earn up to 1.6 CEUs for 2018.

Volume 28 (2017) assessments will be accepted for a separate registration fee of \$95 until December 31, 2018. You can earn up to 1.6 CEUs with this registration! To register, visit eAudiology.org. Volume 28 (2017) assessments will only be accepted via the online program.

WHY? Because you want convenient and cost-effective CEUs!

HOW? To register online, go to www.eAudiology.org. Once you have registered, the JAAA CEU Program will be added to your dashboard, and you will be able to access the assessments from there. If submitting by mail, complete the following and send with your completed answer sheet to the address below.
